

Индивидуальный проект. Шаг 6

Дисциплина: Операционные системы

Кондратьев Арсений Вячеславович

29.09.2022

Российский университет дружбы народов, Москва, Россия

Цель работы

Размещение двуязычного сайта на Github

Выполнение лабораторной работы

1. Сделал поддержку английского и русского языков

Добавил поддержку двух языков в файле languages.yaml(рис.1)

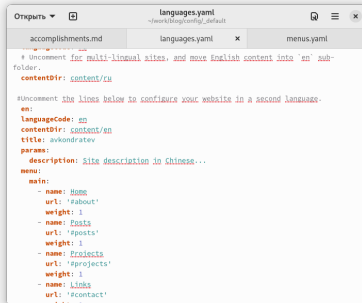

Figure 1: Рис. 2

Изменил информацию обо мне(рис.3)

Figure 3: Рис. 4

Изменил информацию об опыте(рис.4)

A screenshot of a text editor window titled 'experience.md' with a file path '~\work\bing\contest\en\home'. The window displays a JSON array of experience entries. The first entry is partially visible, showing 'location:', 'date_start: '2022-06-08'', 'date_end:', and 'description: I regularly solve algorithmic problems in Python'. The second entry is for 'Hackerrank', with fields for 'company', 'company_url', 'company_logo', 'location', 'date_start', 'date_end', and 'description'. The third entry is for 'Kaggle', with similar fields. The text is color-coded: keys are in blue, strings in red, and the array structure in green.

```
location:  
date_start: '2022-06-08'  
date_end:  
description: I regularly solve algorithmic problems in Python  
  
- title: Hackerrank  
  company:  
  company_url: 'https://www.hackerrank.com'  
  company_logo: hackerrank  
  location:  
  date_start: '2021-10-08'  
  date_end: '2022-02-28'  
  description: Received gold for solving problems in SQL and silver in Python  
  
- title: Kaggle  
  company:  
  company_url: 'https://www.kaggle.com'  
  company_logo: kaggle  
  location:  
  date_start: '2021-12-12'  
  date_end:  
  description: Participated in machine learning competitions
```

Изменил информацию о проектах(рис.5)

```
* projects.md
~\work\blog\content\en\home

# Default filter index (e.g. 0 corresponds to the first 'filter_button' instance
below).
filter_default: 0

# Filter toolbar (optional).
# Add or remove as many filters ('filter_button' instances) as you like.
# To show all items, set 'tag' to "".
# To filter by a specific tag, set 'tag' to an existing tag name.
# To remove the toolbar, delete the entire 'filter_button' block.
filter_button:
  - name: Svc
    tag: "+"
  - name: Gradient boosting
    tag: "Gradient boosting"
  - name: Support vector machine
    tag: "Support vector machine"

design:
# Choose how many columns the section has. Valid values: '1' or '2'.
columns: '2'

# Toggle between the various page layout types.
```
